

A COMPREHENSIVE STAKEHOLDER INTERVIEW GUIDE

Emerging Technology Readiness and Adoption Assessment

Prepared for:

Manila Manufacturing Corporation (MMC)

Prepared by:

TechVision Consulting Inc.- Technology Consultant

Date:

September 11, 2026

I. Introduction

This interview guide is prepared for TechVision Consulting Inc. consultants conducting discovery interviews with key stakeholders of Manila Manufacturing Corporation (MMC). As a consumer goods manufacturer, MMC is exploring the adoption of emerging technologies such as Artificial Intelligence (AI), Machine Learning (ML), Augmented Reality (AR), Internet of Things (IoT), Cloud Computing, Big Data Analytics, and Quantum Computing to modernize operations, improve efficiency, and strengthen its competitiveness. The interviews aim to gather consistent and relevant information about MMC's current operations, awareness and use of emerging technologies, organizational readiness, existing challenges, workforce capabilities, and available resources for technology adoption. The information gathered will serve as a basis for developing the Technology Adoption Recommendation Report.

The interview guide is intended for key stakeholders from management, production and operations, IT, finance, maintenance, quality, supply chain, and other relevant departments. Their insights will help identify MMC's technology needs, opportunities, and priorities and support the development of practical and appropriate technology recommendations.

1.1 Interviewer instructions

- Begin by introducing yourself, and the purpose of the assessment.
- Explain that the interview is intended to understand MMC's current situation and readiness, not to test the interviewee's technical knowledge.
- Ask the questions in the order shown, but use judgment when a stakeholder has already addressed a topic.
- Record concise but specific responses. Capture examples, current practices, constraints, and evidence where available.
- For probing questions, use Why?, How?, Can you elaborate?, Can you give an example?, and What would need to change? as appropriate.
- For close-ended questions, record Yes/No/Partly/Not sure and ask for explanation.
- Do not promise that any particular technology will be adopted. The findings will support a later recommendation.
- Before closing, summarize the most important points and confirm that your understanding is accurate.

1.2 Suggested interview duration

The estimated duration of the interview is 30–60 minutes per interviewee, depending on their role and depth of responses.

II. Interviewee Information

- Name
- Age
- Gender
- Contact Information
- Position/Role
- Department/Unit
- Years of working in MMC
- Date of Interview
- Interviewer Name
- Interview Location/Mode

III. Background and Current State

The purpose of this is to establish a baseline understanding of the interviewee's role and MMC's current operational, technological, and process environment.

Q1. Can you briefly describe your role and main responsibilities at MMC? *[open-ended]*

↳ *Follow-up: How does your role connect with production, supply chain, or customer-facing operations?*

Q2. How would you describe MMC's current production and operational processes (e.g., manual, semi-automated, fully automated)? *[open-ended]*

Q3. What software systems, machinery, or digital tools are currently used in your department? *[open-ended]*

↳ *Follow-up: How long have these systems been in place?*

Q4. Does MMC currently use any form of computer-based automation in manufacturing or administrative processes? *[closed]*

Q5. What are the top three operational challenges your department currently faces? *[open-ended]*

↳ *Follow-up: Can you elaborate on why these are the most pressing?*

Q6. On a scale of 1–5, how efficient would you rate MMC's current operations? *[closed]*

Q7. Has MMC undergone any major technology upgrades or digital transformation initiatives in the past five years? *[closed]*

↳ *Follow-up: If yes, what was the outcome?*

IV. Technology Awareness and Readiness

This section aims to assess the interviewee's familiarity with emerging technologies and MMC's general readiness to adopt them. This focuses more on awareness of emerging technology concepts, perceived benefits, uncertainty, and organizational readiness.

Q8. How familiar are you with the term "emerging technologies"? *[closed]*

↳ *Follow-up: How would you define it in your own words?*

Q9. Which emerging technologies (AI, Machine Learning, AR, IoT, Cloud Computing, Big Data, Quantum Computing) have you heard of or worked with, if any? [open-ended]

Q10. Do you believe MMC is currently prepared, organizationally and technically, to adopt new digital technologies? [closed]

↳ Follow-up: Why or why not?

Q11. Has leadership expressed interest in or set goals around digital transformation or Industry 4.0 adoption? [closed]

Q12. What internal factors (culture, leadership support, past experiences) do you think would help or hinder technology adoption at MMC? [open-ended]

Q13. Would you say employees at MMC are generally open to adopting new technology in their daily work? [closed]

↳ Follow-up: Can you elaborate with an example?

V. Industry and Competitive Analysis

Purpose: Understand MMC's competitive position and the external pressures driving (or discouraging) technology adoption.

Q14. How do you think MMC's use of technology compares to competitors in the consumer goods manufacturing industry? [open-ended]

Q15. Are you aware of competitors or industry peers who have adopted AI, IoT, automation, or other emerging technologies? [closed]

↳ Follow-up: What have you observed about the results of their adoption?

Q16. Do you see any risk to MMC's market position if it does not modernize its operations in the next few years? [closed]

↳ Follow-up: How urgent do you consider this risk?

Q17. What customer or market demands (e.g., faster delivery, product customization, transparency) are currently influencing MMC's operations? [open-ended]

VI. Specific Technology Areas

Purpose: Assess awareness, current use, and interest in each emerging technology area covered in the overview and key areas of Emerging Technologies, and identify which are most applicable to MMC's operations.

6.1 Artificial Intelligence (AI) and Machine Learning

AI is the simulation of human intelligence processes by machines, including learning, reasoning, and self-correction. Machine Learning is an application of AI that enables systems to learn from experience.

Q14. How do you think MMC's use of technology compares to competitors in the consumer goods manufacturing industry? *[open-ended]*

Q15. Are you aware of competitors or industry peers who have adopted AI, IoT, automation, or other emerging technologies? *[closed]*

↳ *Follow-up: What have you observed about the results of their adoption?*

Q16. Do you see any risk to MMC's market position if it does not modernize its operations in the next few years? *[closed]*

↳ *Follow-up: How urgent do you consider this risk?*

Q17. What customer or market demands (e.g., faster delivery, product customization, transparency) are currently influencing MMC's operations? *[open-ended]*

Q18. Does MMC currently use any AI or machine learning tools (e.g., demand forecasting, quality inspection, chatbots)? *[closed]*

Q19. In which areas of the business (e.g., production planning, quality control, customer service) do you see the greatest potential for AI or Machine Learning? *[open-ended]*

↳ *Follow-up: Why do you see potential there specifically?*

Q20. What concerns, if any, do you have about introducing AI-driven decision-making into operations? *[open-ended]*

6.2 Augmented Reality (AR)

AR overlays computer-generated displays, sound, text, and effects onto a user's real-world view, and is increasingly used for training, maintenance, and warehouse operations.

Q21. Is AR technology currently used anywhere in MMC's operations (e.g., equipment maintenance, employee training, warehouse picking)? *[closed]*

Q22. How could AR support tasks such as equipment repair, staff training, or product visualization at MMC? *[open-ended]*

↳ *Follow-up: Can you describe a specific scenario?*

6.3 Internet of Things (IoT)

IoT connects everyday physical objects to the Internet, enabling them to communicate, interact, and support real-time decentralized decision-making.

Q23. Are any machines, sensors, or devices in MMC's facilities currently connected to a network for monitoring or data collection? *[closed]*

Q24. Would real-time monitoring of equipment performance or inventory levels be valuable to your department? *[closed]*

↳ *Follow-up: How would it change the way you work?*

Q25. What barriers (cost, infrastructure, security) do you foresee in connecting production equipment to IoT systems? *[open-ended]*

6.4 Cloud Computing

Cloud computing delivers hosted computing services over the Internet, enabling faster data access and more data-driven production systems.

Q26. Does MMC currently store data or run business systems (e.g., ERP, HR, inventory) on cloud platforms, or primarily on local/on-premise servers? *[closed]*

Q27. What is your comfort level, and MMC's general comfort level, with storing sensitive business data in the cloud? *[closed]*

↳ *Follow-up: What concerns come to mind?*

6.5 Big Data Analytics

Big Data Analytics involves collecting, organizing, and analyzing large data sets to discover patterns and support real-time decision-making.

Q28. How does MMC currently collect and use data for decision-making (e.g., sales trends, production output, customer feedback)? *[open-ended]*

Q29. Would improved data analytics capabilities help address any of the challenges you mentioned earlier in this interview? *[closed]*

↳ *Follow-up: Which challenges specifically?*

6.6 Quantum Computing

Quantum computing uses qubits to solve certain complex problems far more efficiently than conventional computers.

Q30. Are you aware of any potential long-term applications of quantum computing in manufacturing (e.g., complex optimization, materials design)? *[closed]*

Q31. Realistically, how high a priority do you think quantum computing should be for MMC compared to the other technologies discussed? *[closed]*

VII. Skills and Capacity

Purpose: Assess the current workforce's technical skill level and MMC's capacity to build, hire, or train talent needed for technology adoption.

Q32. How would you rate the overall technical/digital skill level of employees in your department? [closed]

Q33. Does MMC currently have IT staff, data specialists, or engineers with experience in AI, IoT, cloud, or automation technologies? [closed]

↳ Follow-up: If not, would MMC need to hire externally or train internally?

Q34. What training programs, if any, does MMC currently offer for digital or technical skills development? [open]

Q35. What skill gaps do you anticipate would need to be addressed before adopting new technologies? [open]

Q36. How receptive do you think employees would be to retraining or upskilling initiatives? [closed]

↳ Follow-up: What factors might affect that receptiveness?

VIII. Budget and Implementation

Purpose: Understand financial constraints, decision-making processes, and practical considerations for implementing new technology.

Q37. Does MMC have a dedicated budget or allocated funds for technology upgrades or digital transformation initiatives? [closed]

Q38. Who is typically involved in approving major technology investment decisions at MMC? [open-ended]

Q39. What is a realistic timeline MMC would consider for piloting a new technology (e.g., 6 months, 1 year, longer)? [open-ended]

Q40. What factors would most influence MMC's decision to invest in a specific emerging technology (e.g., cost, ROI, competitor pressure, employee readiness)? *[open-ended]*

↳ *Follow-up: Which of these factors matters most, and why?*

Q41. Are there any regulatory, safety, or compliance considerations that would affect technology implementation in your area? *[closed]*

Q42. What would you consider a successful outcome of a technology adoption initiative within the first year? *[open-ended]*

IX. Closing

Q44. Of all the emerging technologies discussed, which one or two do you believe MMC should investigate first? *[Open-ended]*

↳ *Follow-up: Why do you believe they are the best starting points?*

Q45. What important issue about MMC's technology readiness have we not discussed? *[Open-ended]*

↳ *Follow-up: Can you elaborate?*

Q46. Is there any additional document, data, process information, or stakeholder you recommend we review or interview? *[Open-ended]*

↳ *Follow-up: Why would that information or person be useful?*

IX. Closing (Wrap-up list)

- Thank the interviewee for their time and participation.
- Confirm whether they are open to a brief follow-up conversation if clarification is needed.
- Explain that the information gathered will be combined with the findings from other stakeholders.
- Remind them that the assessment aims to identify suitable opportunities, areas where the organization may need to improve its readiness, possible challenges or limitations, and practical considerations for implementation.

XI. Document Quality Check

Checker	Result	Proof
AI Checker		
Grammarly		

Rubrics

Criteria	Excellent	Good	Satisfactory	Needs Improvement	Score
Completeness of Sections	All 9 sections complete and well-organized	7-8 sections complete	5-6 sections complete	Less than 5 sections	/15
Question Quality	Questions are clear, relevant, and probing	Most questions clear and relevant	Some questions unclear or irrelevant	Many questions unclear or irrelevant	/15
Coverage of Technologies	ALL emerging technologies covered thoroughly	Most technologies covered	Some technologies covered	Few technologies covered	/25
Alignment with Scenario	Questions perfectly match the MMC	Questions mostly match the scenario	Some questions match the scenario	Questions do not match the scenario	/10

	scenario				
Open-Ended Questions	Excellent mix with effective probes	Good mix with some probes	Some open ended questions	Few open-ended questions	/10
Professional Format	Very professional, clean, and organized	Professional with minor issues	Somewhat professional	Disorganized or messy	/15
Practicality	Questions are practical and usable	Most questions are practical	Some questions are practical	Questions are impractical	/10

TOTAL SCORE: ____ / 100
